Listen and fill in the blanks.

p8, Passage 1 [Track 01]

Dear Mr. Counselor,
My best friend loves she enjoys rumors about other
students, and she constantly spreads and likes to gossip. She frequently
tries to get me about others. But I have no desire to do
that. What should I do when she starts gossiping to me and I don't want to hear it?
Evelyn
Dear Evelyn,
It is great that you don't want to rumors about other students or gossip
about them. Rumors can be to people. They usually start small.
However, they can suddenly develop into and harmful.
Here is an idea: The next time your friend starts gossiping, say to her, "How would you
if someone gossiped about you?" I'm sure your friend is a nice young
lady. She should realize that she gossip about others. Good luck.
Mr. Counselor
p10, Passage 2 [Track 02]
A poor woman had no soup for her eba. A rich woman lived
and cooked soup each day. One day, the aroma from
the rich woman's soup came into the poor woman's home. She her
neighbor some soup, but the rich woman refused. However, the aroma
from the soup was strong. So the poor woman put some eba in her mouth, inhaled the
aroma, and the food. The rich woman saw this and became angry. "Stop
eating the aroma from my soup," she cried. The poor woman did this every day, so the
rich woman the king. "She is the aroma
from my soup. You must her," she told the king. The king agreed. "She
stole the aroma from your soup, so you should her shadow," he said.
He gave her a big stick and told her the poor woman's
shadow forty times. The rich woman felt very silly. She
the poor woman, and they ate real soup together from that day.

p12, Passage 3 [Track 03]

Snow can hours of entertainment children. It can also	
amuse dogs. In fact, many dogs seem to love playing in the snow than	
children do. Why exactly do dogs love snow?	
There are several reasons. First, a typical dog has the mind of a two-year old. Therefore,	
it focuses on basic and desires. One of these is play. Playing in the snow	
is simply fun for dogs. Some dogs, such as huskies and retrievers, have also been bred	
for the snow. They have long, thick, so they do not	
in cold weather because	
their bodies do not heat up too much when they run around. A third reason is that snow	
is new and different, which makes it to dogs.	
No matter what the reasons are, you smiling when you	
see your dog running in the snow and having the time of its life.	

p14, Passage 4 [Track 04]

Spiders are some of nature's most fascinating creatures. They a special
silk to make webs. Some spider silk is incredibly strong and flexible. Scientists are
currently studying to use spider silk for many, including
making bulletproof vests.
Most people believe spiders use their silk for a single purpose: to catch prey.
they catch insects and
other animals with their silk webs. But spiders use their silk for other purposes, too. After
catching prey in their webs, many spiders it in silk to keep it from
escaping. Spiders also use their silk to travel. They make a long thread and
the wind it. The wind can carry the thread and the
spider very Finally, spiders build strong shelters with their silk, and they
their eggs by wrapping them in silk.

p18, Passage 5 [Track 05]

In the 1800s, Andrew Carnegie became one of the world's richest men. How did he do
that? It was easy. He knew the to becoming successful.
One day, Carnegie called Napoleon Hill into his office. Hill was working as a cub reporter
at the time. Carnegie made him an He was going to give Hill the
to spend the next 20 years interviewing the world's richest people. Then,
he could write a book about the secret of those people's wealth,, and
happiness. Hill considered the offer. 29 later, he said yes. Hill later wrote
the book Think and Grow Rich. It became a bestseller and helped create around one
million millionaires.
did Carnegie know it took Hill only 29 seconds to? He
was holding a stopwatch under his desk. Carnegie believed that successful people make
decisions Carnegie wasn't going to give Hill the job if he took more
than one minute to decide.

p22, Passage 7 [Track 07]

Every culture around the world has its own wedding customs. The
people of Wales, which is Britain, have the love spoon.
In the past, when a Welsh man fell in love with a woman, he began making a love
spoon. He used a single piece of and carved a spoon with it. Some love
spoons were Others were elaborate and had many designs on them.
After the man finished the spoon, he gave it to the woman he loved. If the woman
the spoon, they were engaged. They could set a date for their wedding
and start preparing for married life. And what about the spoons? Over time, the spoons
became valuable items in families. Each family would a spoon on a wall.
Some families even new designs their spoons and then
passed them on to their children.

p24, Passage 8 [Track 08]

One night, artist Edvard Munch was walking outside with two of his friends. They had
just left him when he suddenly heard a loud scream. This incident made a
impression on Munch
he got home, he started painting. The result was one of the world's most famous
paintings: <i>The Scream.</i> In <i>The Scream,</i> a person is while his two friends
in the background. The image is about a
of intense horror for the person who is screaming.
Born in Norway in 1863, Edvard Munch was a unique He added
psychological themes to his His style was called symbolism. Sadly,
Munch had a life. Tuberculosis killed his mother and two sisters, and he
suffered from mental illness during his life. But people have long recognized his
greatness as an artist. In fact, in 2012, <i>The Scream</i> was sold at an auction for \$119
million.

p32, Passage 11 [Track 11]

Dear Diary,
This morning, my family and I visited Uluru, which is located in the middle of Australia. It
is a made of a single rock. And it has very steep sides with a nearly
top. This huge rock is 1,141 feet It is nearly
the Empire State Building back home in
New York City. And Uluru is more than two miles long and one mile wide.
I should that it has another name: Ayers Rock. But the Aborigines—the
native people of Australia—call it Uluru, so that's what I'll call it. It is
important to them we hiked around it instead of climbing it.
One thing that really me about Uluru was how it changed colors. We
got there in the afternoon. It brown at that time. But as the sun started
, it became red in appearance. I was told that it looks the same when the
sun at dawn. It was definitely one of the coolest places I have ever
visited.

p34, Passage 12 [Track 12]

Pirot, Serbia, is a small	with fewer than 40,000 people today. For more
than 400 years, people in Pirot have	been making Pirot carpets. The carpets are only
made in this because	e they must be created with wool
Pirot sheep. The carpets are the sa	ame on both and have colorful
designs. They can for	or more than a century. The carpets also contain
stories that can tell readers when they	were made.
Weavers have to spe	cific rules when making the carpet. They must do
all of the work	They can weave one square meter of
carpet	If either of the two weavers
working on a carpet makes a mistak	e, they the carpet apart. They do
that even if they are almost finished	with it. Sadly, people make Pirot
carpets these days. One hundred y	ears ago, more than 5,000 weavers made Pirot
carpets. Today, 10 professionals and a	few older women make them.

p38, Passage 13 [Track 13]

"Hey, Dad, let's on the kayak." "Actually, son," the boy's
father replies, "that isn't a kayak. It's a canoe."
Many people get kayaks and canoes since they have some similarities.
But there are also many differences between the two boats. Kayaks and canoes are both
lightweight boats that people by using paddles. Most people use them
for recreational activities, including They are also designed to move in
shallow water.
As for their, people usually sit on a seat in a canoe. But kayakers sit in
the bottom of the boat and their legs in front of them.
People in canoes use single-bladed paddles, but kayakers use double-bladed paddles.
The of a canoe is open whereas a kayak has a closed deck. This
canoes many people and supplies, but kayaks cannot
do that. Finally, canoes move fairly slowly while kayaks can travel much
p40, Passage 14 [Track 14]
Many people have phobias. A phobia is an excessive of something.
People with phobias often have similar symptoms. They may become dizzy, sweaty, or
breathless. Some experience panic attacks while others even fear they will
. There are more than 100 kinds of phobias. Here are the top ten phobias
people suffer from.
The fear of
: Women have this more than men.
snakes: Personal experiences and culture often it.
heights: People with it try to stay away from places.
: It makes people crowds and open spaces.
dogs: Being bitten by a dog in childhood may cause it.
thunder and lightning: Storms severely frighten people who have this phobia.
injections: Many people with this visit hospitals.
social situations: People with this may suffer panic attacks if they must speak in public.
: Up to 10% of all people avoid planes because of it.
germs and dirt: People with this may their hands constantly.

p42, Passage 15 [Track 15]

Cultures around the world tell stories about In Western culture, dragons
are usually fierce, evil monsters. But dragons in Chinese culture are different. In Chinese
culture, there are two important dragons: the Spirit Dragon and the Earth Dragon. The
Spirit Dragon the rain and wind while the Earth Dragon controls the
rivers. Around 2,000 years ago, the Chinese wanted to the importance of
dragons in their culture. So they the dragon dance.
First, they make a long of a dragon. These figures can be more than 60
meters Each figure has a head, a body, and a tail and a
dragon. The dancers stand beneath it and use poles to the dragon up
and to move it. This creates the illusion of a dragon. Since the Chinese
often regarded dragons as water spirits, the dragon dance frequently
it is swimming. Today, people do the dragon dance in parades,
especially on Chinese New Year.

p44, Passage 16 [Track 16]

Around two people on the Earth live in very housing. In
addition, natural disasters, wars, and other problems make many people
their homes each year. Fortunately, one group of volunteers does its best to
people their housing problems.
Habitat for Humanity is a nonprofit group based in the United States. It was founded in
1976. Since then, it has sent volunteers all around the world. They build new homes and
existing ones. The group has the housing situations of
more than one million families. Habitat for Humanity does not provide these homes
though.
The group builds homes and thenthem for low prices. It even provides
financial help for low-income people. And new homeowners
volunteer their time to help others. That way, they will
be able to support others in need of housing.

I'm a typical middle school student who loves			
my friends. I look like everyone else except for one thing: I have two			
stubby as other			
people's thumbs are.			
I have a condition called brachydactyly. I inherited it from my father. Basically, the bones			
in our thumbs are mormal. This condition only affects			
my father and me in our thumbs. I've heard that other people have it in all of their			
fingers though. And some people have it in their toes. I don't worry too much about it			
because my doctor said that brachydactyly doesn't usually cause any for			
people. And my thumbs function perfectly well.			
However, stubby thumbs people's attention. I am sometimes asked			
to my thumbs. People seem to think I slammed my			
thumbs in a door. I don't answering since they are mostly			
about why my thumbs look so different from everyone else's.			

p54, Passage 20 [Track 20]

When you wake up in the morning, have you ever noticed that your breath
? You are not alone in having morning breath. Even
people who eat healthy food and brush their teeth at night get it. Would you like to
know why?
Surprisingly, our bodies are of bacteria. Many are, but
some are In the mouth, there are helpful bacteria. At night, they
consume food particles trapped between the and gums. While these
bacteria eat, they produce a bad-smelling gas. In addition, when you sleep, your body
makes less saliva. This causes mouth. Dry mouth lets bacteria reproduce
very quickly. All of these new bacteria consume more food particles, so they cause even
morning breath.
How can you morning breath? Floss your teeth every night before going
to bed more water and less coffee. Avoid eating many
spicy foods such as onions and garlic as well. Those activities won't completely get rid of
morning breath, but they will it a lot.

Have you ever seen a of Grumpy Cat? Grumpy Cat is a well-known
Internet celebrity. In every picture of her, she has a frown on her Many
pictures of Grumpy Cat have expressions such as "This is my happy face" or "Smile? I am
smiling" on them.
What did you do when you a picture of Grumpy Cat? If you are
most people, you emailed it to your friends. When you did that, you
took part in an Internet meme.
Internet memes are social or cultural and symbols that are passed
one person another
They can be images or videos. The most common ones are images of
people or animals with or clever captions. The majority of Internet
memes are based on
Memes are actually not new. They used to as fables, stories, and word-
of-mouth jokes. However, thanks to the Internet, memes can spread faster than ever
today. Many times, these Internet memes go viral, so they might getor
even millions—of views in just a few days.

p64, Passage 24 [Track 24]

Every night in northern	parts of the w	orld such	as Siberia,	Canada,	and Green	nland,
people get treated to a	beautiful show. Tl	ne sky ligh	ts up in		colors.	Blue,
green, purple, brown, a	nd even red		flash thro	oughout	the night.	They
aren't watching normal	fireworks. Instead	d, they are	e seeing nat	ure's ow	n firework	s, the
Northern Lights.						
The Northern Lights are		phenomer	a called auro	oras. The	y are caus	ed by

p68, Passage 25 [Track 25]

Hi. My name is Vanessa. I have a younger brother. We normally
well, but sometimes we fight. We fight about all kinds of different
things. What do you and your often fight about?
My brother and I fight about the computer. We always want to be the first to check our
Facebook pages and to play computer games. Hannah
I a room with my sister. We about who has to clean it.
We sometimes fight about the music we play. I love hip-hop, but my sister
classical music. I can't stand her music! Emily
My younger sister constantly my clothes and bags. But she never asks
for permission, so that makes me really We fight when she takes
something of mine
Chloe
I don't have any siblings. I wish I had a younger brother to fight with. Daniel
I fight with my brothers about sports. They always me no matter how
hard I try, and then I get and fight with them. I I
wouldn't do that. George
p70, Passage 26 [Track 26]
Each year, millions of people purchase new computer monitors and televisions to replace
their old ones. Then, they frequently their old electronics
As a result, the of tech trash is increasing around the
world. In the United States alone, nearly 330,000 tons of tech trash is produced annually.
Many of the products contain material that is hard to, so they simply
get piled up in garbage dumps. And the materials in these products can
leak into the Sometimes they get into the water supply, which can
the water people drink.
Fortunately, there are ways to reduce the amount of tech trash. People can use their
electronic products longer. They can also
to recycle them. They can also them to companies that will

p72, Passage 27 [Track 27]

Today, centuries after the Roman Empire, the Romans continue to
influence modern times. One way concerns the months of the year.
The gods were important to the Romans, so they several months
them. January is named after Janus, the god of beginnings and endings.
March comes from Mars, the god of war is named after Maia, the
goddess of growing plants, and June comes from Juno, the goddess of marriage. As for
July and, they get their names from the brilliant general Julius Caesar
and Augustus Caesar, the first Roman emperor, respectively.
Several months are named because of their on the Roman calendar.
April was the month of the year for the Romans. Its name
the Latin word for two. Likewise, September, October,
November, and December were the seventh,, ninth, and tenth months.
Their names come from the Latin words for seven, eight, nine, and ten. What about
February? It is named after the Roman festival Februa to Februus, the
Roman god of purification.

p74, Passage 28 [Track 28]

Is it for a house to be swallowed by the ground? The answer is yes. The
house instantly disappears, and all you can see is a huge in the ground.
This is a sinkhole.
Sinkholes because of activity that
under the ground. Water and chemicals dissolve carbonate rocks such as limestone. This
usually happens over a long of time. As the rock disappears,
and holes underneath the ground begin to appear. Eventually, the cave
or hole becomes too This means that the ground above it can no
longer be supported. This results in the sudden collapse of the land, which
a sinkhole. Sinkholes can be one meter in diameter and
depth more than 600 meters in diameter and depth. One sinkhole in
China is around 700 meters

On each year, every single player on a Major League
Baseball (MLB) team wears the same What is the importance of this
number? They are honoring the man who broke baseball's color barrier.
It was April 15, 1947, when a man became the first black person to in
the Major Leagues. His name was Jackie Robinson. Before him, all of the players were
white. At that time, American was, so blacks and whites
didn't do activities together. There were schools, restaurants, and other places for whites.
There were also ones for blacks.
Despite his as a baseball player, playing in the Major Leagues wasn't
easy for Jackie. Baseball fans and some other players didn't want to have him in the
same league. During his career, he had to racism. But
his success opened the door more blacks to play in the Major Leagues,
so Americans soon began accepting them.
Nowadays, in the league wears 42, Jackie's uniform
number, on April 15. They call it Jackie Robinson Day and celebrate it to remember his

p90, Passage 34 [Track 34]

There are many kinds of pasta, including spaghetti, of course. Most pasta is made of
wheat or some other grain. But did you know you can make pasta from?
There is pasta made from spaghetti squash.
Spaghetti squash is a large and white, yellow, or orange vegetable. When it is cooked, its
flesh can be removed This creates long
strands that spaghetti. Here is a simple recipe for spaghetti squash
pasta.
1 a whole spaghetti squash in the oven at 190 degrees Celsius for one
hour.
2. Take the squash out of the oven and it
the flesh with a fork.
3 some butter in a pan and add garlic and basil for a
couple of minutes.
4. Add the strands of spaghetti squash to the pan. Sprinkle some salt on top.
5. Add some parmesan cheese. Then, everything together, put it on a
plate, and enjoy a meal.

p92, Passage 35 [Track 35]

You've probably seen this food in salads. And you've definitely seen it as a topping on		
your combination pizza. What is it? It is the olive. Most people believe the olive is a		
vegetable. But it is actually a small that comes from the olive tree.		
Olive trees mostly in coastal areas around the Mediterranean Sea.		
People in that region have been olives for more than 7,000 years. Today,		
during the harvesting season, many tourists visit there.		
Olives are green when they start growing and sometimes change to black when they		
ripen. They have a taste, so they often need to be cured before people		
consume them. People in the past ate olives, and they also made olive oil from them. In		
fact, the olive tree itself had great importance to people in times.		
Winners in the ancient Olympics in Greece received made of olive		
branches, and the Olympic flame itself burned by using olive oil.		
Today, people enjoy eating olives as snacks, or they them		
other foods. And since olives have, that		
has increased their popularity.		

p94, Passage 36 [Track 36]

When winter comes and the temperature	below 0 degrees Celsius, lakes,
ponds, rivers, and streams begin to	But if you go to the
, you'll notice that the water has not turne	ed into ice.
The reason is the salt in ocean water	er. The hydrogen and oxygen
molecules form When water freezes, th	ey come together. But the salt
makes it harder for them to do that. As a result, the freez	ing point of ocean water is -1.8
degrees Celsius. This means that salt water needs to be _	than fresh water
to freeze. An additional reason is that ocean water is con	stantly moving. This movement
it Thus	s ocean water becomes colder
much more slowly than the water in lakes and ponds. For	r that reason, the ocean usually
only freezes in very cold places, such as the North Pole ar	nd the South Pole.

p98, Passage 37 [Track 37]

Nowadays, most people smile when someone their picture. But take a
look at old photographs from the 1800s. In those pictures, nobody is
Instead, the people in the pictures have looks on their faces.
The main reason comes from cameras. They were new in the 1800s, so the technology
was Today, we can take pictures in an instant. But in the past, some
cameras needed 15 minutes to take a single picture trying to smile for
that long. You might get cramps in your face.
Another reason is that pictures used to be Many people only took one
picture of themselves their entire lives. They wanted the picture to represent them well,
so they tried to look serious in it.
Finally, many people in the past had bad teeth, which were often decayed or chipped. If
they smiled, their teeth would show in the picture. They
their teeth and didn't smile at all.

p100, Passage 38 [Track 38]

When you look in the mirror, are you happy with the person you see? Or do you ever
say things like, "I'm too," "I'm tall," "I wish I had bigger
eyes," or "I think I'm ugly"?
If you make those comments or similar ones, you may have a self-esteem problem. Self-
esteem refers to how you about yourself. For many young people, their
bodies are closely related to their self-esteem.
But remember a few things. First, as a teenager, your body is constantly changing. It is
to feel awkward at times. Second, don't
the negative aspects of your body. Instead, think about the positive ones, such as
the negative aspects of your body. Instead, think about the positive ones, such as, how healthy you are,
, how healthy you are,
and what kinds of you have. Third, nobody is perfect. The

p102, Passage 39 [Track 39]

There is a th	at is mostly frozen. No plants, except for some small	
flowers, bushes, and mosses, g	row there. Guess where it is. It is tundra, which is in the	
northern parts of Asia, Europe,	and North America.	
Tundra covers around 20% of the	ne Earth's land surface. It is very hostile to life. The reason	
has to do with the cold tempe	ratures. A meter or two	
, the ground is	permanently frozen. Trees cannot grow in tundra because	
their cannot b	reak through the rock-hard permafrost. Only plants with	
small root systems can grow the	nere. Animals living in tundra have adapted to the harsh	
conditions. They have	fur to keep them They also have	
small ears and tails	the loss of heat	
from their bodies. Many of these animals only live in tundra during the		
months. When	comes, they migrate southward to warmer lands.	

p104, Passage 40 [Track 40]

Recently, a health organization in England did a young
people in that country. It made an amazing discovery. 45% of 2,100 people aged 16 to
24 responded that they had some kind of back or neck That percentage
was than it was in previous studies.
According to the study, many young people have inactive lifestyles. They have a lot to
do with their back and neck problems. Young people around ten hours
a day In addition, they only spend around two hours a day exercising.
Another reason for the back and neck pain is somewhat: electronic
devices, particularly smartphones. Many young people use their smartphones for more
than just $____$. But when
they use their smartphones, they often over to look at them. This causes
their heads to tilt forward and their shoulders to curve. Doctors call this "text neck."
Because of this, the natural curve of a person's neck can disappear. As a
result, people can pain in both the back and the neck.
